

IT ENGINEER

SENIOR INFORMATION TECHNOLOGY ENGINEER | CLOUD ARCHITECTURE, PLATFORM ENGINEERING & DEVOPS SPECIALIST

📍 São Paulo, SP 📞 (19) 99210-5415 ✉ it.engineer@gmail.com 🔗 linkedin.com/in/it-engineer

📁 EXECUTIVE SUMMARY

Senior Information Technology Engineer with extensive experience in scalable systems architecture, legacy infrastructure modernization, and platform engineering. Expert in implementing DevOps, SRE, FinOps, and DevSecOps practices to ensure the stability, security, and efficiency of mission-critical environments. Proven track record in technical and cultural leadership of engineering teams, driving agile methodologies, technical debt reduction, and end-to-end automation.

⚙️ KEY COMPETENCIES

- ✓ **Cloud Architecture & IaC:** On-Premises to Cloud Migration, Multi-Cloud, Terraform, Ansible, CloudFormation.
- ✓ **Platform Engineering & SRE:** Building Internal Developer Platforms (IDP), Advanced Observability (Prometheus, Grafana, Jaeger), Service Mesh.
- ✓ **Operational Efficiency & FinOps:** Cost reduction in elastic infrastructure, resource rightsizing, and capacity management.
- ✓ **Security & DevSecOps:** Credentials governance (HashiCorp Vault), Policy as Code, secure CI/CD pipelines, technical compliance (GDPR/LGPD).

👥 LEADERSHIP

- ✓ **Technical Leadership (Tech Lead):** Guiding engineering teams in the design and execution of complex distributed architectures.
- ✓ **SRE & Blameless Post-Mortem Culture:** Implementing a blameless post-mortem culture, focusing on system resilience and reduction of repetitive incidents.
- ✓ **Mentorship and Capability Building:** Disseminating technical knowledge via architecture blueprints, coding dojos, and tech talk facilitation.
- ✓ **Technical Stakeholder Management:** Ability to translate complex technical risks and issues (such as technical debt) for executive leadership.
- ✓ **Crisis Management (War Rooms):** Effective coordination of task forces during high-pressure, high-impact production incidents.

📁 PROFESSIONAL EXPERIENCE

Principal Platform Engineer / SRE Specialist

2024 – Present

Tech Unicorns & Global Companies

- ✓ Technical leadership in the creation and adoption of a self-service Internal Developer Platform (IDP), reducing infrastructure provisioning lead time from days to minutes.
- ✓ Established a Blameless Post-Mortem culture and chaos engineering practices to significantly increase microservices resilience.
- ✓ Implemented comprehensive Observability infrastructures based on the L.E.T.S. model (Logs, Errors, Toneladas de métricas, Traces) utilizing Prometheus and Grafana.
- ✓ Provided continuous technical mentorship to junior and mid-level engineers, accelerating onboarding and team maturity.

Tech Lead / Cloud & Security Architect2022 – 2024

Fintechs & Financial Institutions

- ✓ Led the secure and transparent migration of high-volume transactional databases with zero downtime in production environments.
- ✓ Designed and deployed a DevSecOps architecture featuring centralized secrets management through HashiCorp Vault.
- ✓ Automated compliance and audit workflows via Policy as Code to satisfy strict regulatory and banking standards.
- ✓ Integrated automated security scanning loops (SAST/DAST) seamlessly into early stages of CI/CD pipelines.

Senior DevOps Engineer / FinOps Specialist2019 – 2022

Tech Retail & Global E-Commerce

- ✓ Led structured FinOps initiatives, delivering massive cloud cost reductions through infrastructure rightsizing and automated environment shutdowns.
- ✓ Orchestrated highly redundant Multi-Cloud topologies and resilient disaster recovery strategies for the logistics sector.
- ✓ Mapped and prioritized legacy code refactoring to systematically eliminate critical technical debt, freeing up engineering capacity for product teams.
- ✓ Coordinated and led high-pressure technical War Rooms to mitigate and root-cause Severity 1 incidents during high-traffic peak seasons.

Infrastructure Engineer / Senior Backend Developer2015 – 2019

Enterprise Software & IT Consultancies

- ✓ Fully automated the testing pyramid within release pipelines, optimization developer feedback loops and quality assurance.
- ✓ Executed end-to-end migrations of mission-critical workloads to cloud environments (AWS/Azure) following strict Infrastructure as Code (Terraform) practices.
- ✓ Created enterprise architecture playbooks and hosted periodic Tech Talks to standardize software engineering best practices.
- ✓ Designed and implemented Service Mesh (Istio) to streamline communication, enforce mutual TLS (mTLS), and enhance microservices distributed tracing.

CERTIFICATIONS

AWS Certified Solutions Architect – Professional

Certified Kubernetes Administrator (CKA)

HashiCorp Certified: Terraform Associate

FinOps Certified Practitioner (FCP)

DevOps Institute Certified DevSecOps Engineer

ITIL 4 Foundation

Professional Scrum Master (PSM I)

Google Cloud Certified Professional Cloud Architect

EDUCATION

✓ Bachelor of Science in Computer Engineering / Computer Science

✓ Specialization in Distributed Systems Architecture

LANGUAGES

Advanced English

Native Portuguese

Intermediate Spanish

✓ MBA in Software Engineering and IT Governance
