

ANTONIO A. MALAGUTTI

ENGINEERING MANAGER | PRINCIPAL SPECIALIST IN SOFTWARE ARCHITECTURE, PLATFORMS & DATA/AI

📍 Sao Paulo, SP, Brazil 📞 +55 (19) 99210-5415 ✉️ amalagutti@gmail.com 🔗 [linkedin.com/in/amalagutti](https://www.linkedin.com/in/amalagutti)

📌 EXECUTIVE SUMMARY

Executive and technical leadership in Software Engineering with a solid track record in managing and scaling complex digital platforms. Extensive experience coordinating multidisciplinary teams covering the entire engineering lifecycle: from high-performance Full Stack development to cloud infrastructure (DevOps/DevSecOps), encompassing Data governance and Artificial Intelligence (AI/ML/MLOps). Proven success in aligning large-scale product roadmaps, optimizing operational efficiency, and establishing robust engineering cultures focused on resilience and value delivery.

⚙️ KEY COMPETENCIES

- ✓ **Full Stack & Mobile Engineering:** Solid Computer Science fundamentals (Data Structures & Algorithms, LeetCode) applied to scalable Backend solutions (Node.js, Python, Java, Go, Rust, C++, Ruby on Rails, Django, Spring Boot, ASP.NET Core) and high-performance Frontend/Mobile applications (React, Next.js, TypeScript, Vue, Angular, Flutter, Swift/iOS, Kotlin/Android) driven by consistent Design Systems.
- ✓ **System Design, Architecture & APIs:** Design and governance of robust architectures (Microservices, Event-Driven, Distributed Systems), GraphQL, elastic REST APIs, and performance optimization under high concurrency using distributed caching layers (Redis) and relational/NoSQL databases (PostgreSQL, MongoDB, Elasticsearch).
- ✓ **DevOps, Cloud & DevSecOps:** End-to-end automation of infrastructure as code (IaC via Terraform), container orchestration management (Docker, Kubernetes) in public clouds (AWS), edge computing/CDN (Cloudflare), automation via Shell/Bash/Linux, systematic Code Review, and active security mechanisms (API Security, Cyber Security, AI Red Teaming).
- ✓ **Artificial Intelligence, ML & Data:** Execution of the complete lifecycle in Data Engineering (SQL, analytical pipelines) and Data Science/AI platforms (acting as Data Engineer, Data Analyst, and BI Analyst). Practical implementation of MLOps, Prompt Engineering, and structured AI Agents focused on corporate automation and cutting-edge technological paradigms (Claude Code, Vibe Coding, OpenClaw).

👤 LEADERSHIP

- ✓ **Engineering Management at Scale (Scale EM):** Direct leadership of multiple squads, talent acquisition, retention of key technical professionals, structuring engineering career paths, and agile product synchronization (alignment between Product Manager and Engineering Manager).
- ✓ **Crisis Management & Backend/Frontend Performance:** Leading multidisciplinary task forces in technical War Rooms and executing complex architectural audits to resolve critical bottlenecks like memory leaks, network latency, and security vulnerabilities.
- ✓ **Technical Evangelism & DevRel (Developer Relations):** Driving alignment and engineering cultures based on knowledge sharing, compiling advanced blueprints (Technical Writer), and global standardization of software engineering best practices.
- ✓ **Technical and Non-Technical Stakeholder Management:** Strategic bridge between business executives, product managers, and operations teams, translating massive investments in architectural refactoring and technical debt mitigation into real financial impact and reduced compliance risks.

PROFESSIONAL EXPERIENCE

Engineering Manager / Principal Software Architect

2025 – Present

MLGTT Consulting - IT Consulting and Services (focused on Project Management, Agility, Data, and AI).

Client: Tech Unicorn & Data/AI Products - Consultoria Analítica e Serviços de TI

- ✓ Led end-to-end technical transitions in complex platforms, leveraging advanced AI utilities into real developer workflows (such as approaches based on Claude Code, Vibe Coding, and OpenClaw).
- ✓ Supervised multiple engineering tracks (Frontend, Backend, Mobile, DevOps, QA) responsible for designing and sustaining highly decoupled microservices through modern System Design patterns.
- ✓ Implemented rigorous and systematic Code Review routines and automated CI/CD pipelines focused on early detection of security vulnerabilities and drastic improvements in Backend performance.
- ✓ Fostered Developer Relations (DevRel) initiatives by compiling robust documentation (Technical Writer) and architecture playbooks, reducing the onboarding learning curve for new technologies by 50%.

Tech Lead / Senior Specialist in AI, ML & MLOps

2025

PwC Brasil - Audit, Tax, Corporate Advisory, and Business Consulting (one of the Big Four accounting firms).

Client: Large Corporations (Financial and Consumer Goods Sectors) - Grandes Instituições Financeiras e Seguradoras

- ✓ Strategic design and orchestration of the complete Artificial Intelligence lifecycle at an enterprise scale, leading from proof-of-concept prototypes as an AI Engineer and Data Scientist to production-ready MLOps scaffolds.
- ✓ Architected next-generation software solutions using advanced Prompt Engineering and autonomous AI Agents to automate complex operational workflows and analytics across distributed datasets.
- ✓ Injected continuous proactive security (AI Red Teaming) into enterprise data streams, isolating potential vulnerabilities within corporate intelligent systems.
- ✓ Optimized analytical processing queries and streaming pipelines (acting as Data Engineer and Data Analyst) using large volumes of structured data in PostgreSQL and fast indexing in Elasticsearch.

DevOps / DevSecOps & Cloud Platform Specialist

2024

insi (Meta IT) - Information Technology, Outsourcing, and Digital Transformation Consulting.

Client: Large Clients - Mídia, Entretenimento e Telecomunicações

- ✓ Executed full automation of elastic Multi-Cloud infrastructures utilizing strict Infrastructure as Code (Terraform) principles within large-scale AWS ecosystems.
- ✓ Orchestrated elastic container workloads in production Kubernetes clusters via Docker, integrating global edge-computing and CDN capabilities through the Cloudflare platform.
- ✓ Defined technical compliance mechanisms and automated enforcement of security policies (Cyber Security / API Security) directly within developer branch pipelines without impacting time-to-market.
- ✓ Acted as technical lead for production stability monitoring, aggressively reducing critical downtime incidents through systematic architectural audits and distributed cache governance via Redis.

Senior Full Stack Developer / Core Systems Engineer

2021 – 2023

Grupo Globo - Media, Communication, and Entertainment.

Client: Internal (Digital Distribution & Streaming Platforms) - Mídia, Entretenimento e Telecomunicações

- ✓ Developed robust Backend applications using strongly typed and highly concurrent ecosystems (Go, Rust, Java/Spring Boot, Python/Django, Ruby on Rails) and clean user interfaces based on React, Next.js, and

TypeScript.

- ✓ Architected native and hybrid codebases for high-visibility mobile ecosystems, coupling iOS (Swift & SwiftUI) and Android (Kotlin) layers through cross-platform frameworks like Flutter and React Native.
- ✓ Advanced data modeling for high-performance relational and non-relational database clusters (Advanced SQL, PostgreSQL, MongoDB), ensuring total data integrity and query execution indexing.
- ✓ Collaborated directly with product teams to design reusable patterns following strict UX Design concepts, maximizing front-end velocity for global software engineering operations.

Agile Coach / Specialist in Digital Transformation and Engineering Practices

2018 – 2019

Accenture (SolutionsIQ) - Management Consulting, Technology, and Agile Transformation (SolutionsIQ is Accenture's specialized Agile practice).

Client: Large Financial Institutions and Insurance Companies - Grandes Instituições Financeiras e Seguradoras

- ✓ Led agile transformation and software engineering evolution across large enterprise clients, establishing governance for engineering metrics and efficiency through agile-at-scale methodologies.
- ✓ Provided technical mentorship to Engineering Managers and Product Managers on agile product synchronization, ensuring the reduction of structural technical debt and increasing digital platform resilience.
- ✓ Designed continuous delivery pipelines with a focus on modern engineering, applying code quality best practices (Clean Code) and automated testing across multidisciplinary squads.
- ✓ Facilitated technical War Rooms and fostered strong knowledge-sharing cultures within large operational structures, breaking down traditional corporate governance barriers.

Software Architecture Consultant / Technical Engineering Lead

2008 – 2017

CI&T - Software Development and Digital Transformation (Lean Digital).

Client: Large-Scale Global Clients - Grandes Instituições Financeiras e Seguradoras

- ✓ Architected and developed high-criticality enterprise systems utilizing microservices approaches, robust System Design patterns, and elastic API integrations.
- ✓ Conducted systematic architectural audits on high-concurrency distributed systems to optimize complex SQL queries, relational data modeling, and efficient caching strategies.
- ✓ Directly managed the technical pipeline for hiring, onboarding, and engineering career paths (Career Path) for senior technical talent assigned to international projects.
- ✓ Sustainably applied software engineering best practices through constant alignment with UX Design teams and corporate infrastructure specialists.

CERTIFICATIONS

AWS Certified Solutions Architect – Professional

Certified Kubernetes Administrator (CKA)

HashiCorp Certified: Terraform Associate

FinOps Certified Practitioner (FCP)

Google Cloud Certified Professional Cloud Architect / Data Engineer

Certified DevSecOps Engineer (DevOps Institute)

Professional Scrum Master (PSM I)

ITIL 4 Foundation / COBIT 2019 Expert

EDUCATION

- ✓ Bachelor's Degree in Physics (UNICAMP)

LANGUAGES

- ✓ Associate Degree in Data Processing (FATEC)
- ✓ MBA in IT Management (UNIP)

Advanced English

Native Portuguese

Intermediate Spanish
