

ANTONIO A. MALAGUTTI

SENIOR INFORMATION TECHNOLOGY ENGINEER | CLOUD ARCHITECTURE, PLATFORM ENGINEERING & DEVOPS SPECIALIST

📍 São Paulo, SP, Brazil 📞 +55 (19) 99210-5415 ✉️ amalagutti@gmail.com 🔗 [linkedin.com/in/amalagutti](https://www.linkedin.com/in/amalagutti)

📄 EXECUTIVE SUMMARY

Senior Information Technology Engineer with extensive experience in scalable systems architecture, legacy infrastructure modernization, and platform engineering. Specialist in implementing DevOps, SRE, FinOps, and DevSecOps practices to ensure the stability, security, and efficiency of mission-critical environments. Strong background in the technical and cultural leadership of engineering teams, promoting agile methodologies, technical debt reduction, and end-to-end automation.

⚙️ KEY COMPETENCIES

- ✓ **Cloud Architecture & IaC:** On-Premises to Cloud Migration, Multi-Cloud, Terraform, Ansible, CloudFormation.
- ✓ **Platform Engineering & SRE:** Building Internal Developer Platforms (IDP), Advanced Observability (Prometheus, Grafana, Jaeger), Service Mesh.
- ✓ **Operational Efficiency & FinOps:** Cost reduction in elastic infrastructure, resource optimization, and capacity management.
- ✓ **Security & DevSecOps:** Credentials governance (HashiCorp Vault), Policy as Code, secure CI/CD pipelines, technical compliance (LGPD/GDPR).

👥 LEADERSHIP

- ✓ **Technical Leadership (Tech Lead):** Guiding engineering teams in designing and executing complex distributed architectures.
- ✓ **SRE & Post-Mortem Culture:** Implementing a Blameless Post-Mortem culture, focusing on resilience and reducing repetitive incidents.
- ✓ **Mentorship and Capability Building:** Disseminating technical knowledge through architecture blueprints, coding dojos, and hosting Tech Talks.
- ✓ **Technical Stakeholder Management:** Proven ability to translate complex technical risks and issues (such as technical debt) for executive leadership.
- ✓ **Crisis Management (War Rooms):** Effective coordination of task forces during critical production incidents with high business impact.

📁 PROFESSIONAL EXPERIENCE

Principal Platform Engineer / SRE Consultant

2025 – Present

MLGTT Consulting - IT Consulting and Services (focused on Project Management, Agility, Data, and AI).
Client: Tech Unicorn & Global Companies - Consultoria Analítica e Serviços de TI

- ✓ Technical leadership in creating and driving the adoption of a self-service Internal Developer Platform (IDP), reducing infrastructure provisioning time from days to minutes.
- ✓ Established a Blameless Post-Mortem and chaos engineering culture to increase microservices resilience across highly complex architectures.
- ✓ Implemented end-to-end Observability environments based on the L.E.T.S. model (Logs, Errors, Tonnes of metrics, Traces) utilizing Prometheus and Grafana.
- ✓ Provided ongoing technical mentorship to junior and mid-level engineers, accelerating internal onboarding and technical maturity.

Tech Lead / Cloud & Security Architect

2025

PwC Brasil - Audit, Tax, Corporate Advisory, and Business Consulting (one of the Big Four accounting firms).

Client: Fintechs & Financial Institutions - Grandes Instituições Financeiras e Seguradoras

- ✓ Led the secure and transparent migration of high-volume transactional databases with zero downtime in production environments for major financial sector players.
- ✓ Designed and implemented a DevSecOps architecture featuring centralized secrets management with HashiCorp Vault.
- ✓ Automated auditing processes and technical compliance pipelines via Policy as Code to meet stringent regulatory standards and corporate governance.
- ✓ Integrated secure, continuous deployment pipelines (CI/CD) with automated dynamic vulnerability scanning (SAST/DAST).

Senior DevOps Engineer / FinOps Specialist

2024

insi (Meta IT) - Information Technology, Outsourcing, and Digital Transformation Consulting.

Client: Tech Retail & Global E-Commerce - Grande Marketplace e Varejo Tecnológico

- ✓ Led structured FinOps initiatives, achieving substantial cloud cost reductions through proper instance rightsizing and automated shutdown routines.
- ✓ Structured Multi-Cloud environments with high geographical redundancy and resilient disaster recovery strategies for critical logistics operations.
- ✓ Mapped and prioritized code refactoring to systematically eliminate critical technical debt, restoring predictable delivery capacity to product teams.
- ✓ Led and technically coordinated War Rooms for the mitigation, containment, and root-cause analysis of Severity 1 incidents during peak traffic periods.

Senior Infrastructure / Backend Engineer

2021 – 2023

Grupo Globo - Media, Communication, and Entertainment.

Client: Grupo Globo (Internal) - Mídia, Entretenimento e Telecomunicações

- ✓ Fully automated the testing pyramid for release pipelines, optimizing the quality feedback loop for high-concurrency streaming systems and portals.
- ✓ Executed comprehensive migrations of critical workloads to elastic cloud environments (AWS/Azure) using strict Infrastructure as Code (Terraform) practices.
- ✓ Authored corporate architecture blueprints and conducted recurring Tech Talks to disseminate software engineering best practices and Cloud-Native patterns.
- ✓ Designed and deployed Service Mesh (Istio) to optimize communication, mutual security (mTLS), and end-to-end traceability among microservices.

Systems Automation Specialist / DevOps Engineer

2018 – 2019

Accenture (SolutionsIQ) - Management Consulting, Technology, and Agile Transformation (SolutionsIQ is Accenture's specialized Agile practice).

Client: Enterprise Infrastructure & Telecom - Mídia, Entretenimento e Telecomunicações

- ✓ Developed and executed modernization strategies for on-premises mission-critical infrastructure, driving early stages of virtualization and high availability under an agile transformation approach.
- ✓ Created robust, automated scripts for complex system tasks, mitigating operational risks and centralizing logs in highly distributed environments.

- ✓ Implemented rigorous system integration and agile delivery routines to accelerate the lifecycle of new core business modules.
- ✓ Collaborated actively with multidisciplinary and consulting teams to map architectural dependencies and refine high-performance requirements.

Mid-Level Systems Engineer / Software Developer

2008 – 2017

CI&T - Software Development and Digital Transformation (Lean Digital).

Client: Tech Consulting & Global Clients - Consultoria Analítica e Serviços de TI

- ✓ Designed and coded stable backend solutions, emphasizing code reusability, readability, project pattern enforcement, and comprehensive unit testing.
- ✓ Acted directly in deep troubleshooting and support of complex production environments, significantly reducing the Mean Time to Repair (MTTR).
- ✓ Participated actively in the technical governance of large-scale corporate projects in domestic industrial and financial sectors using scaled agile frameworks.
- ✓ Produced structured technical documentation for existing architectures and facilitated internal technical sessions to share software engineering best practices.

CERTIFICATIONS

AWS Certified Solutions Architect – Professional

Certified Kubernetes Administrator (CKA)

HashiCorp Certified: Terraform Associate

FinOps Certified Practitioner (FCP)

DevOps Institute Certified DevSecOps Engineer

ITIL 4 Foundation

Professional Scrum Master (PSM I)

Google Cloud Certified Professional Cloud Architect

EDUCATION

- ✓ Bachelor of Science in Computer Engineering / Computer Science
- ✓ Specialization in Distributed Systems Architecture
- ✓ MBA in Software Engineering and IT Governance

LANGUAGES

Advanced English

Native Portuguese

Intermediate Spanish
