📋 EXECUTIVE SUMMARY

Senior professional with a solid track record in technical leadership and strategic management of complex enterprise database environments. My approach bridges the technical depth required to ensure high availability, security, and performance of critical data with the governance vision essential to align IT infrastructure with business objectives. Specializing in hybrid and multi-cloud architectures, I lead high-complexity structural migrations and operational turnaround projects, drastically reducing incidents and downtime. With strong background in established frameworks and automation, I interface between software engineering and infrastructure teams, driving operational efficiency and continuous optimization of storage and compute costs.

⚙️ KEY COMPETENCIES

- ✓ **High Availability & DR:** Clustering, Replication, Log Shipping, AlwaysOn, and Disaster Recovery Plans.
- ✓ **Performance Tuning:** Query Optimization, Execution Plan Analysis, Strategic Indexing, and Profiling.
- ✓ **Governance & Compliance:** Data Auditing, LGPD/GDPR, Masking, Encryption (TDE), and ISO/COBIT Standards.
- ✓ **Modern Architectures:** SAP/BI Integration, Cloud Databases, Data Lakehouse, and Data Infrastructure Automation.

👤 LEADERSHIP

- ✓ **Business Acumen:** Aligning infrastructure capacity with business growth projections.
- ✓ **Project Leadership:** Coordinating large-scale migrations and version upgrades with zero production downtime.
- ✓ **Executive Communication:** Translating technical metrics (IOPS, Latency, Deadlocks) into financial and business impacts.
- ✓ **Strategic Mindset:** Resilience during critical incidents, maintaining focus on root cause analysis and action plans.
- ✓ **Financial Skills:** Capacity Planning, software licensing management (Oracle/SQL Server), and FinOps.

📁 PROFESSIONAL EXPERIENCE

Freelance DBA Consultant & Data Architect

2025 – Present

[MLGTT Consulting](#) / [MLGTT Consulting](#)

- ✓ Technical leadership in cloud database architecture projects (AWS, GCP) and data pipeline optimization.
- ✓ Translating volume and concurrency requirements into infrastructure backlogs, mitigating scope creep.
- ✓ Utilizing Lean methodologies (A3 Framework) to diagnose performance bottlenecks and structural slowdowns.
- ✓ Automating backup, restore, and preventive maintenance workflows to ensure leaner operations.

Database, AI & Compliance Program Manager

2025

[PwC Brasil](#) / [PwC Brasil](#)

- ✓ Modernization and governance of financial databases, bridging data engineering, auditing, and finance.

- ✓ Designing structural database blueprints for secure model deployment in highly regulated environments.
- ✓ Ensuring 100% availability and stability of the Data Warehouse during critical monthly financial closings.
- ✓ Implementing technical database performance indicators (availability, IOPS, latency, and transaction error rates).

Infrastructure Transformation & Operational Efficiency Manager

2024

Meta IT / Meta IT

- ✓ Achieved a 20% reduction in ticket resolution time (Lead Time) through query automation and support WIP limits.
- ✓ Led the technical turnaround of senior engineering teams with a focus on infrastructure quality metrics.
- ✓ Managed cultural and technical team transitions during major system architecture transformations.

Data Platform & Corporate Database Administrator Manager

2021 – 2023

Grupo Globo / Grupo Globo

- ✓ Optimized compute and corporate licensing costs through migration to managed platforms.
- ✓ Acted as the primary technical decision-maker in critical data incidents, ensuring corporate database integrity.
- ✓ Standardized database governance and access for over 100 squads via 'Golden Paths'.
- ✓ Developed Python scripts to automate auditing, volumetrics, and storage KPI monitoring reports.

Senior Data Strategy & Database FinOps Consultant

2018 – 2019

Accenture (SolutionsIQ) / Accenture (SolutionsIQ)

- ✓ Structural cloud server optimizations yielding 28% savings in the global infrastructure budget.
- ✓ Recovered critical production environments under high pressure, reducing system downtime by 90%.
- ✓ Applied resilience and objectivity during severe database crises, focusing on rapid root-cause isolation.
- ✓ Served as a technical bridge between client vision and database performance viability, preventing structural bottlenecks.

Senior DBA & Data Infrastructure Operations Lead

2008 – 2017

CI&T / CI&T

- ✓ Fine-tuning and optimization of SAP/BI integration, generating recurring savings of R\$ 1.2M/year due to processing efficiency.
- ✓ Scaled database support operations from 5 to 25 teams focused on high-complexity global contracts.
- ✓ Rigorous application of best practices based on ITIL, COBIT frameworks, and ISO security/audit standards.
- ✓ Managed high-pressure production crises, restructuring maintenance plans and renegotiating SLAs with stakeholders.
