

ANTONIO ALFREDO MALAGUTTI

ENGINEERING MANAGER | PRINCIPAL SPECIALIST IN SOFTWARE ARCHITECTURE, PLATFORMS & DATA/AI

📍 São Paulo, SP, Brazil 📞 +55 (19) 99210-5415 ✉️ amalagutti@gmail.com 🔗 [linkedin.com/in/amalagutti](https://www.linkedin.com/in/amalagutti)

📄 EXECUTIVE SUMMARY

Executive and technical leadership in Software Engineering with a solid track record of managing and scaling complex digital platforms. Extensive experience coordinating multidisciplinary teams and covering the entire engineering lifecycle: from high-performance Full Stack development to cloud infrastructure (DevOps/DevSecOps), spanning across Data governance and Artificial Intelligence (AI/ML/MLOps). Proven success in aligning large-scale product roadmaps, optimizing operational efficiency, and establishing robust engineering cultures focused on value delivery and resilience.

⚙️ KEY COMPETENCIES

- ✓ **Full Stack & Mobile Engineering:** Strong foundations in Computer Science (Data Structures & Algorithms, LeetCode) applied to scalable Backend solutions (Node.js, Python, Java, Go, Rust, C++, Ruby on Rails, Django, Spring Boot, ASP.NET Core) and high-performance Frontend/Mobile applications (React, Next.js, TypeScript, Vue, Angular, Flutter, Swift/iOS, Kotlin/Android) driven by consistent Design Systems.
- ✓ **System Design, Architecture & APIs:** Design and governance of robust architectures (Microservices, Event-Driven, Distributed Systems), GraphQL, elastic REST APIs, and performance optimization under high concurrency using distributed caching layers (Redis) and relational/NoSQL databases (PostgreSQL, MongoDB, Elasticsearch).
- ✓ **DevOps, Cloud & DevSecOps:** End-to-end automation of infrastructure as code (IaC via Terraform), container orchestration management (Docker, Kubernetes) across public clouds (AWS), edge computing/CDN (Cloudflare), automation via Shell/Bash/Linux, systematic Code Review, and active security mechanisms (API Security, Cyber Security, AI Red Teaming).
- ✓ **Artificial Intelligence, ML & Data:** Full lifecycle execution in Data Engineering (SQL, analytical pipelines) and Data Science/AI platforms (Data Engineer, Data Analyst, BI Analyst roles). Practical implementation of MLOps, Prompt Engineering, and structured AI Agents focused on enterprise automation and bleeding-edge tech paradigms (Claude Code, Vibe Coding, OpenClaw).

👤 LEADERSHIP

- ✓ **Scale Engineering Management:** Direct leadership of multiple squads, talent acquisition, retention of key technical players, engineering career path structuring, and agile product synchronization (Product Manager/Engineering Manager alignment).
- ✓ **Crisis Management & Backend/Frontend Performance:** Leading cross-functional task forces in technical War Rooms and executing complex architectural audits to solve critical bottlenecks regarding memory leaks, network latency, and security vulnerabilities.
- ✓ **Technical Evangelism & DevRel (Developer Relations):** Driving alignment and engineering cultures based on knowledge sharing, compiling advanced blueprints (Technical Writer), and global standardization of software engineering best practices.
- ✓ **Technical & Non-Technical Stakeholder Management:** Strategically bridging the gap between business executives, product managers, and operation teams, translating massive architectural refactoring investments and technical debt mitigations into real financial impact and compliance risk reductions.

PROFESSIONAL EXPERIENCE

Engineering Manager / Principal Software Architect

2024 – Present

Multinational Tech Company & Core Architecture

- ✓ Led end-to-end technical transitions of complex platforms leveraging advanced AI utilities in live developer workflows (such as Claude Code and Vibe Coding/OpenClaw approaches).
- ✓ Supervised multiple engineering tracks (Frontend, Backend, Mobile, DevOps, QA) responsible for designing and sustaining highly decoupled microservices through modern System Design patterns.
- ✓ Implemented rigorous, systematic Code Review routines and CI/CD automated gates aimed at early detection of security vulnerabilities and drastic improvements in Backend Performance.
- ✓ Fostered Developer Relations (DevRel) initiatives by compiling robust documentation (Technical Writer) and architecture playbooks, reducing the onboarding learning curve for new technologies by 50%.

Tech Lead / Senior Specialist in AI, ML & MLOps

2022 – 2024

Tech Unicorn & Data/AI Products

- ✓ Strategically designed and orchestrated the complete lifecycle of enterprise-scale Artificial Intelligence, leading from concept prototypes as an AI Engineer and Data Scientist to production-ready MLOps scaffolding.
- ✓ Architected cutting-edge software solutions leveraging advanced Prompt Engineering and autonomous AI Agents to automate complex operational workflows and analytics across distributed datasets.
- ✓ Embedded continuous proactive security (AI Red Teaming) inside enterprise data streams, isolating potential vulnerabilities within corporate intelligent systems.
- ✓ Optimized analytical processing queries and streaming pipelines (Data Engineer/Data Analyst roles) using high-volume datasets structured in PostgreSQL and fast indexing in Elasticsearch.

DevOps / DevSecOps & Cloud Platform Specialist

2019 – 2022

Global Ecommerce & Cloud Platforms

- ✓ Executed full automation of elastic Multi-Cloud infrastructures utilizing strict Infrastructure as Code (Terraform) principles across large-scale AWS ecosystems.
- ✓ Orchestrated container workloads elastically over production Kubernetes clusters via Docker, integrating global edge-computing and CDN capabilities through Cloudflare's platform.
- ✓ Defined automated policy enforcement and technical compliance mechanisms (Cyber Security / API Security) directly inside developer branch pipelines without lowering time-to-market.
- ✓ Acted as technical lead for production stability monitoring, aggressively reducing critical downtime incidents through systematic architectural auditing and distributed cache governance via Redis.

Senior Full Stack Developer / Core Systems Engineer

2015 – 2019

Software House & Enterprise Applications

- ✓ Engineered robust Backend applications using highly concurrent, strongly typed ecosystems (Go, Rust, Java/Spring Boot, Python/Django, Ruby on Rails) and clean user interfaces based on React, Next.js, and TypeScript.
- ✓ Architected native and hybrid codebases for highly visible mobile ecosystems, coupling iOS (Swift & SwiftUI) and Android (Kotlin) layers via cross-platform frameworks such as Flutter and React Native.
- ✓ Performed advanced data modeling for high-throughput relational and non-relational database clusters (Advanced SQL, PostgreSQL, MongoDB), securing total data integrity and query execution indexing.
- ✓ Collaborated directly with product teams to design reusable patterns following strict UX Design concepts, maximizing front-end velocity for worldwide software engineering operations.

CERTIFICATIONS

AWS Certified Solutions Architect – Professional

Certified Kubernetes Administrator (CKA)

HashiCorp Certified: Terraform Associate

FinOps Certified Practitioner (FCP)

Google Cloud Certified Professional Cloud Architect / Data Engineer

Certified DevSecOps Engineer (DevOps Institute)

Professional Scrum Master (PSM I)

ITIL 4 Foundation / COBIT 2019 Expert

EDUCATION

- ✓ Bachelor of Science in Physics (UNICAMP)
- ✓ Associate Degree in Data Processing (FATEC)
- ✓ MBA in IT Management (UNIP)

LANGUAGES

Advanced English

Native Portuguese

Intermediate Spanish
